

# Airzone Tacto zone system

REF: SISTPLT

This system incorporates a new programmable master thermostat with a touch-screen.

It controls the operation of the air-conditioning installation in general and that of the zone in which it is located.

An intuitive interface makes it extremely easy to use.

It is recommended that this thermostat be installed in rooms that are used at regular times, such as bedrooms.

## SPECIFIC CHARACTERISTICS OF THE AIRZONE TACTO SYSTEM

- Wall-mounted digital thermostat with touch-sensitive screen.
- Programmable by weeks, days or groups of days.
- Allows for the definition of up to three daily scenarios, with programmed activation and deactivation times and temperature set point.
- Communication and power supply via Airzone type-A six-lead cable.
- Available in two colours:

Alpine white Discovery grey

## FUNCTIONS

- **Set-point control** with a differential of  $\pm 32.9F$ .
- **Set-point temperature selection** at intervals of  $32.9F$  and ranging from  $59^{\circ}F$  to  $95^{\circ}F$ .
- **Eco-sleep function**: the set point varies during the first 2 hours of operation, rising by  $32.9F$  every 30 minutes in the summer cycle and falling at the same rate in the winter cycle.
- **Auto-restore**: in the event of an electrical cut, the system returns to its previous status when the electricity comes back on.
